

# Make Musical Instruments!

## 1. The Renaissance Guitar

### You will need:

- 1 shoe box
- 1 kitchen roll tube
- 2 pencils
- 4 rubber bands, of different widths to make different notes

### Lets Make:

- First, draw a circle about 8cm in diameter into the lid of the shoe box and cut out to make your sound hole
- Draw another circle around the end of your shoebox and cut out. This is to slide the kitchen roll tube or "neck" into
- Stretch your rubber band around the shoe box to make your strings
- Slide your pencils under the strings top and bottom to make a bridge. Your guitar will not work without one!

You can decorate your guitar as you go with paint, patterns and prints to make it look Tudor! Now start strumming!
